CITEC Email Screening Solutions

With the increasing adoption of the Internet and email as primary communication mediums, viruses, pornographic material and unsolicited email have required businesses to insulate themselves from this threat. CITEC has partnered with MessageLabs, the global leader in email security to bring you a range of email screening solutions that ensure the continuity of your business.

CITEC Email Anti-Virus

The CITEC Email Anti-Virus (EAV) screening solution is the most advanced anti-virus screening service in the world. Operating at the Internet level rather than the server or desktop, CITEC's solution is a fully managed service that can be switched on in a matter of minutes, and requires no additional hardware or software. Once activated, all inbound and outbound email is re-routed through central control towers where they are screened by four industry-leading anti-virus scanners before being passed on to their final destination, without impacting on email delivery times.

CITEC Email Anti-Spam

The CITEC Email Anti-Spam (EAS) screening solution effectively stops unsolicited email from entering destination systems by checking all incoming mail before it reaches the network. The CITEC Email Anti-Spam screening solution is unique in that it enables customised per-user filtering criteria to be set up – using a combination of public and internal white and blacklists. It also allows customised handling of all suspect email freeing up human resources, alleviating bandwidth issues and significantly reducing the demands on valuable storage space.

CITEC Email Anti-Porn

The CITEC Email Anti-Porn (EAP) screening solution attacks the growing problem of pornography in the workplace. By taking a different approach from other conventional image filtering software, rather than just analysing flesh-tones, the CITEC email Anti-Porn screening solution uses Image Composition Analysis (ICA) technology to detect content such as suspect poses, facial expressions, clothing and overall image content.

ABOUT CITEC

CITEC is a national information and communications technology (ICT) service provider with offices in Brisbane, Sydney, Canberra and Melbourne.

As Queensland's largest ICT provider CITEC's clients include local, national and multinational organisations.

Founded in 1964, CITEC has today established itself as the second largest Australian-owned Information Systems outsourcer and is ranked seventh in IDC's "Australian IT Outsourcing Market, Top 10 Players, 2004" (Source – IDC, 2005).

CITEC manages several high security data centres and has approximately 550 employees located across Australia. CITEC owns, through its investment company CSI Holdings Pty Ltd, a majority interest in HR/payroll software developer Aurion Corporation.

Our mission is to provide quality bundled information and communications technology (ICT) services and solutions, based upon world class infrastructure and technology that support our clients' business processes.

CITEC combines leading edge technology, established techniques, innovative concepts and individual expertise to achieve seamless, practical business solutions.

Our strength lies in our staff's extensive knowledge of a wide range of hardware, software and network environments, and unmatched experience in developing business solutions to meet client needs.

Product Description
